About the Founder

Shubham Pathak
Founder & CEO, ZYANIX

Shubham Pathak is the Founder & CEO of ZYANIX, a technology studio dedicated to helping startups, businesses, and organizations build scalable digital products through modern software engineering, AI, cloud infrastructure, and automation.

He founded ZYANIX with a clear vision: to make high-quality technology accessible, affordable, and fast for every business. Before ZYANIX, he established ZENSTRO IT Solutions, where he gained practical experience delivering web and software solutions. Building on that foundation, he launched ZYANIX with a stronger focus on innovation, reliability, and long-term partnerships.

His expertise spans full-stack web development, SaaS platforms, ERP/CRM systems, AI-powered applications, cloud infrastructure, DevOps, and cybersecurity. Rather than simply delivering projects, he emphasizes solving real business problems with technology that is scalable, secure, and easy to maintain.

Under his leadership, ZYANIX has successfully delivered 30+ projects, is actively working on 10+ ongoing projects, and has maintained a zero-complaint track record by prioritizing quality, transparency, and client satisfaction.

Shubham believes that technology should empower businesses, not complicate them. This philosophy is reflected in ZYANIX's core values of Innovation, Automation, Transparency, and Continuous Growth.

"Technology should simplify businesses, automate repetitive work, and create opportunities for growth. At ZYANIX, we don't just build software—we build long-term partnerships based on trust, quality, and innovation."

— Shubham Pathak
Founder & CEO, ZYANIX

Core Expertise
